

Disclosure Review Board Minutes
8/14/06

1. ACS ST067

This request was tabled. (b) (6) was working with the sponsor on this.

2. STP312

This was approved. There should be 3 workers in an occupation group before data can be shown for a geographic area. The data will be rounded as all census special tabulations.

3. ACS special tabulation Stamford CT

This was denied. Tract data will not be available until ACS starts producing 5 year estimates.

4. CPS ASEC 2006 (b) (6)

This was approved.

5. Metropolitan Area Exports

This was approved. Note that the geography is overlapping and the bulk of the request consists of groupings of one dimensional tables. Foreign trade has worked with SRD on the suppression pattern.

6. ACS/Census 2000 Foreign born tabulation

This was approved by email. A geographic threshold of 3 foreign born from 3 different households must be met before the tables are shown. A rounding of 10 should be applied. Mexico and the balance of Latin America both have sufficient totals to split the Latin America category, though each must satisfy the threshold.

7. Special census special tabulation Orange Beach

This was approved. In order to qualify for tabulation, a block should have 10 or more persons and 3 or more households. Also, for purposes of this tabulation, GQ persons will be counted as “nonrelatives” and no group quarters count will be given.
