

Disclosure Review Board Minutes
1/11/10

1. HUD request for housing assistance program flags

HUD may add a single yes/no flag to the file stating whether the unit receives 1 or more of the assistance programs.

2. SSA memo on model output

We think this is probably OK. (b) (6) will check with (b) (6) to make sure that the estimates are all several years into the future and that no microdata will be released. If the methods for obtaining the estimates or their publication changes, SSA must return to the DRB for approval.

3. DSEP issue

We had a short discussion about sensitive variables and vulnerable populations. This will be discussed at DSEP on 1/14/10, and we are hoping for guidance from them.
