

Disclosure Review Board Minutes
6/12/06

1. Transcripts and Tapes from (b) (6)

(b) (6) was unable to make the meeting. She will come next week. Our current thinking is that we may be able to release the transcripts but not the tapes. The contractor should return all tapes ASAP. Was there any type of consent statement? We would like to see a sample of the transcripts. Was there any type of topcoding, recoding, geographic threshold? (b) (6) would like us to keep in mind that these data are from 1991.

2. State level tables of IRS data

This was approved.

3. STP_305 (b) (6)

This was tabled. Kalawao should be combined with Maui. We would like information on the differences between the 2 types of geographic areas. Perhaps we should collapse age groups.

4. STP_304 HUD (b) (6)

They must cross tract by county subdivision and each piece of identifiable geographic area must have 3 or more AIAN unweighted households for the data to be shown. Complementary suppression or combining of areas to meet this threshold must be applied.

5. WI sanitary districts

This was approved.
