1. 2010 Census Special Report on CBSAs
This was approved.

2. Census MMR Question
This was approved.

3. 2010 IA Tabulations
This was approved.

4. Small Area Estimates of Crime
This was approved.

5. ACS VA data
This was approved. The data will be rounded as all ACS special tabulations. There must be at least an average cell size of three unweighted cases in a table (this must include all variables in the table). Only the five year data will be used.

6. ACS ST316
This was approved. The data will be rounded as all ACS special tabulations. There must be at least 50 unweighted cases in each neighborhood. Geographic areas must be checked for any possible geographic slivers from data that has already been released.

7. (b) (6) request
This seems fine, but Laura will call (b) (6) to ensure that none of the percentages are close to 0% or 100%.

8. ACS HHS follow-up from the last meeting
This was approved. This is five year data. Anything that has been published or is derivable (exactly, not just similar) from something that has been published can be shown as is. For anything new, the cells marked with Xs will not be published, the cells with NAs will be collapsed, there must be at least 3 unweighted households in the given geographic area, and the data will be rounded as all ACS special tabulations.
