

Disclosure Review Board Minutes
4/11/05

1. Access to double-coded sample

This request was denied. We do not want to release any additional microdata from Census 1990.

2. Population Reference Bureau request for ACS data

This was approved. The data will be rounded as all ACS special tabulations. DRB rules for quintiles will be used. They cannot have the top income threshold in the top quintile of family income.

3. Youth Volunteering and Civic Engagement Survey

This was tabled. The Board would like to see the list of variables and their categories that will appear on the microdata file (rather than just the survey form).

4. ACS workplace tables

There must be at least 50 unweighted workers in sample in a given workplace for the tables to be shown. There must be at least 3 unweighted workers in sample for each mode in a given place for the data to be shown. Otherwise the data must be collapsed or suppressed and complementary suppression must be applied.

5. Zero records versions of CES data sets

This was approved. We recommend getting approval from our legal department and the IRS. Also, decennial census and ACS data should be checked to make sure that for GQ records, the only categories shown are Institutional/Non-Institutional.
