

Disclosure Review Board Minutes
9/27/10

Attendees: Arnie Reznick, Laura Zayatz, Phil Steel, Phil Gbur, Mark Asiala, Tom Blatt, Judy Eargle, Marie Pees, Susan Bucci, Sharon Neugebauer; guests: (b) (6)

1. 2008 NYCH&VS special tabs

These were approved.

2. NCVS 2010 Quarters 1 & 2 PUF

These were approved.

3. ACS 5 Year Base Tables for PUMAs

These may be published as long as PUMA boundaries have not changed. The DRB and SRD disclosure research team would like more time before making a decision about publications when PUMA boundaries do change.

4. Publishable Counties, ACS 06-08, "At Risk" Homeless Population

(b) (6) should use the actual 3 year data and collapse them to eliminate all unweighted counts of 1 and 2. Complementary collapsing is required. Only weighted counts will be published. The data will be rounded as all ACS special tabulations. Tables will only be shown for areas with a population of 20,000 or more. Subtraction issues must be found and dealt with by collapsing or suppression (with complements) such as ages 17 and 30.

5. ACS derived tables question

Both the numerator and the denominator should be based on three unweighted cases, unless both values have already been published elsewhere.

6. ACS 2009 1-year PUMS

This was approved. Laura will put the GQ weights issue on a DRB agenda in the near future for us to discuss exactly what we want for future publications.

*** Mark noted that we may need more detailed minutes. If Laura ever gets a staff, she will make that happen.
