

Disclosure Review Board Minutes
8/28/06

1. (b) (6) synthetic data presentation. This was approved. The board spent some time both in phone conference last week and at the meeting discussing criteria for the eventual data release request. None of the tables proposed revealed much about coefficients (and/or the model's variable list), SIC/state, or prior distributions. The last is derived directly from protected data and may be the most problematic; the others may also be subject to debate.
2. CPS SOPEMI tab. This was approved. The request is a national tab rounded to thousands.
