1. Department of Labor

They should use the list of 500+ occupations for PUMAs and POWPUMAs. For residence and workplace tables, they can use the 90+ list for areas with a population of 20,000 or more. For flow tables and the 90+ list, there should be a population of 20,000 or more in both the residence and workplace, and there should be at least 50 unweighted cases in the flow. If they want to add other variables such as age or education, they should publish the data for PUMAs and POWPUMAs.
